NEVADA SIGNS AGREEMENT FOR ATLANTIS LITHIUM PROPERTY IN NEVADA

January 6, 2016, Vancouver, British Columbia - Nevada Sunrise Gold Corporation ("Nevada Sunrise" or the "Company") (TSXV: NEV) is pleased to announce it has entered into an interim agreement for an option to purchase a 100% interest in the Atlantis lithium property ("Atlantis", or the "Property") located in the Fish Lake Valley in Esmeralda County, Nevada. Atlantis is comprised of unpatented placer association claims totaling 1,262 acres (510 hectares) located approximately 25 miles (38 kilometres) northwest of the Silver Peak lithium brine mine operated by Albemarle Corporation (ALB: NYSE), the only operating lithium mine in North America.

Details of the Option Agreement for Atlantis

For an option to purchase a 100% interest in Atlantis, Nevada Sunrise has agreed to pay a total of 500,000 common shares of the Company to the vendor upon signing a definitive agreement (the "Agreement") for the Property, and on subsequent anniversaries of the Agreement, as follows:

- On signing the Agreement: 100,000 common shares
- 1st Anniversary: 150,000 common shares
- 2nd Anniversary: 250,000 common shares

A 1.5 mile (2.25 kilometer) area of interest applies to the Property. Atlantis is subject to a 3.0% gross overriding royalty ("GOR"). On the 3rd anniversary of the signing of the Agreement for Atlantis, Nevada Sunrise would have the right to purchase 1.0% of the GOR for US\$1.0 million.

The interim letter agreement for Atlantis provides Nevada Sunrise with an exclusive 30-day due diligence period and is subject to certain conditions, including approval by the Board of Directors of the Company, execution of a definitive option agreement, and acceptance of the Agreement by the TSX Venture Exchange.

For further information on Atlantis including a map showing its location, see the Company's website under "Projects-Nevada Lithium" at: <http://www.nevadasunrise.ca/projects/nevadolithium/>

About Atlantis

Nevada Sunrise has adopted an exploration strategy targeting desert basins, or playas, that exhibit similar geological and geophysical characteristics to the Clayton Valley basin where lithium brines are known to accumulate in faulted sub-basins, or "traps". Nevada Sunrise made the decision to acquire Atlantis after a review of geological mapping that shows the presence of lithium-bearing rocks in the ranges draining into the Property, and historical ground gravity data that shows a distinct gravity low in the heart of the Atlantis claims. Nevada Sunrise believes that the interpreted gravity low indicates the presence of a deep, sub-basin that could host lithium-bearing brines. Geophysical exploration at Atlantis in the form of detailed gravity and CSAMT surveys would assist in determining if conductive brines are present at depth, followed by exploratory drilling of interpreted geophysical targets.

As part of a regional lithium exploration program, the United States Geological Survey ("USGS") reported in Open-File Report 81-962 (1981) that historical drill hole FL-11a is located outside the eastern boundary of the Property, approximately 3 miles (4.5 kilometres) east of the centre of the

interpreted sub-basin. Hole FL-11a was drilled to a depth of 450 feet (147 metres) and encountered lithium values in sediments ranging from 10 parts per million ("ppm") to 115 ppm and averaging 61.7 ppm for 67 samples analyzed. Lithium in sampled ground water ranged from trace at the end of the hole to 21 ppm at a depth of 55 feet (18 metres). Nevada Sunrise believes that drilling deeper holes at Atlantis within the area of the interpreted sub-basin could intersect aquifers potentially hosting trapped brines with higher contents of lithium than were encountered in the relatively shallow USGS hole drilled to the east of the gravity low anomaly. Also reported in USGS Open File Report 77-54 (1977) were the collection of 10 surface brine samples with lithium contents ranging 37 – 350 mg/l (ppm), and averaging 159 mg/l (ppm) to the north of the sub-basin.

John R. Kerr, P. Eng., is the Company's designated Qualified Person within the meaning of National Instrument 43-101, and has reviewed and approved the technical information contained in this news release.

About Nevada Sunrise

Nevada Sunrise is a junior mineral exploration company with a strong technical team based in Vancouver, BC, Canada, that holds interests in seven exploration projects in the State of Nevada, USA. Our three key gold assets include a 21% interest in a joint venture with Pilot Gold Inc. (TSX: PLG) at Kinsley Mountain near Wendover, a 100% interest in the Golden Arrow project near Tonopah, and a 100% interest in the Roulette gold property in the southeastern Carlin trend near Ely, with each of the properties subject to certain production royalties. Nevada Sunrise began acquisitions of Nevada lithium properties in September 2015, which include options to earn 100% interests in the Neptune and Clayton Northeast projects located in the Clayton Valley area, and 100% interests in the Jackson Wash and Atlantis projects, each located in playas adjacent to the Clayton Valley.

FORWARD LOOKING STATEMENTS

All statements in this release, other than statements of historical fact, are "forward-looking information" with respect to Nevada Sunrise Gold Corporation ("Nevada Sunrise") within the meaning of applicable Canadian securities laws, including statements that address future mineral production, reserve potential, exploration drilling, the future price of lithium, potential quantity and/or grade of minerals, potential size of a mineralized zone, potential expansion of mineralization, the timing and results of future resource estimates, or other study, proposed exploration and development of our exploration properties and the estimation of mineral resources. Forward-looking information is often, but not always, identified by the use of words such as "seek", "anticipate", "plan", "continue", "estimate", "expect", "project", "predict", "potential", "targeting", "intends", "believe", "potential", and similar expressions, or describes a "goal", or variation of such words and phrases or state that certain actions, events or results "may", "should", "could", "would", "might" or "will" be taken, occur or be achieved. These statements involve known and unknown risks, uncertainties and other factors which may cause the actual results, performance or achievement of Nevada Sunrise to differ materially from those anticipated in such forward-looking information.

Such factors include, among others, risks related to the interpretation and actual results of historical exploration at the Atlantis property, reliance on technical information provided by third parties on any of our exploration properties, including access to historical information on the Atlantis property; current exploration and development activities; changes in project parameters as plans continue to be refined; current economic conditions; future prices of commodities; possible variations in grade or recovery rates; failure of equipment or processes to operate as anticipated; the failure of contracted parties to perform; labor disputes and other risks of the mining industry; delays in obtaining governmental approvals, financing or in the completion of exploration, as well as those factors discussed in the section entitled "Risk Factors" in the Company's Management Discussion and Analysis for the Nine Months ended June 30, 2015, which is available under Company's SEDAR profile at www.sedar.com.

Although Nevada Sunrise has attempted to identify important factors that could cause actual actions, events or results to differ materially from those described in forward-looking information, there may be other factors that cause actions, events or results not to be as anticipated, estimated or intended. There can be no assurance that such information will prove to be accurate as actual results and future events could differ materially from those anticipated in such statements. Nevada Sunrise disclaims any intention or obligation to update or revise any forward-looking information, whether as a result of new information, future events or otherwise. Accordingly, readers should not place undue reliance on forward-looking information.

Forward-looking statements are made as of the date hereof and accordingly are subject to change after such date. Except as otherwise indicated by Nevada Sunrise, these statements do not reflect the potential impact of any non-recurring or other special items or of any dispositions, monetizations, mergers, acquisitions, other business combinations or other transactions that may be announced or that may occur after the date hereof. Forward-looking statements are provided for the purpose of providing information about management's current expectations and plans and allowing investors and others to get a better understanding of our operating environment. Nevada Sunrise does not undertake to update any forward-looking statements that are included in this document, except in accordance with applicable securities laws.

Neither TSX Venture Exchange nor its Regulation Services Provider (as that term is defined in the policies of TSX Venture Exchange) accepts responsibility for the adequacy or accuracy of this release. The Securities of Nevada Sunrise Gold Corporation have not been registered under the United States Securities Act of 1933, as amended, and may not be offered or sold within the United States or to the account or benefit of any U.S. person.
